CROWN Management and Research Structure

Colorado River Basin Consortium for Optimized Energy-Water Systems from Nontraditional Sources (CROWN)

Executive Director
P. Xu

Industrial Liaison Officer
P. Fiske

Deputy Director
D. Sedlak

Operations Director
T. Schaub

Steering Committee

Industrial Advisory Board

- Jacobs Engineering Group
- Captura Corporation
- Active Membranes
- Next TFX, Inc.
- Hydranautics
- EnergyX
- DuPont
- Tidal Metals
- Equatic Technology
- Imagine H2O
- National Research Platform / National Artificial Intelligence Research Resource (NRP/NAIRR) NGL

Stakeholder Advisory Board

- Arizona Public Service (APS)
- MSSC
- City of Phoenix
- Colorado Produced Water Consortium (CoPWC)
- Central Valley Salinity Alternatives for Long-Term Sustainability (CV-SALTS)

Education and Outreach Committee

Science Advisory Board

Research Thrusts

T1
Basin Resource Assessment and Opportunity Mapping
B. Scanlon

T2
Safeguarding water-energy security in AI industries
T. Tong

T3
Lowering costs and energy use for brackish water desalination and wastewater reuse through brine volume minimization
M. Elimelech

T4
Scalable technologies for the treatment and reuse of produced water
C. Newtson

T5
Revolutionizing brine management through valorization of bulk chemicals

Securing domestic supply chain for critical mineral resources through brine mining
Z. Ren

T6
Autonomous process control and optimization
T. Cath

Cross-Cutting Platform: BASIN-WE
Basin Analytics and Systems Intelligence Network for Water and Energy
AI-powered decision support, data integration, and systems intelligence
